RE: THANK YOU

This letter is in recognition of Concrete Solutions work with Chandos Construction on the RDCRS St. Joseph project completed in February 2017. This key performance indicators as well as the other conditions of satisfaction on this project were held at the highest expectations of Alberta Infrastructure and RDCRS. The project was delivered successfully in large part due to the Concrete Solutions on site team and project management team. These team members came to the table with a positive and “can do” attitude to work with the Chandos, which played a large part in making this project a success.

Out of the box thinking to resolve challenging delivery and constructability issues on a project with such a tight timeline was critical to our success. Your cooperation was greatly valued when dealing with planning and implementation. Furthermore, your team’s attention to detail, quality control and assurance allowed the project closeout to happen in good time and contributed to the potential of repeat business with RDCRS.

On behalf of the entire Chandos Construction team I would like to thank the members of your team for their efforts on the project and we greatly looking forward to doing more projects with your team in the future.

Yours truly,
CHANDOS CONSTRUCTION LTD.
